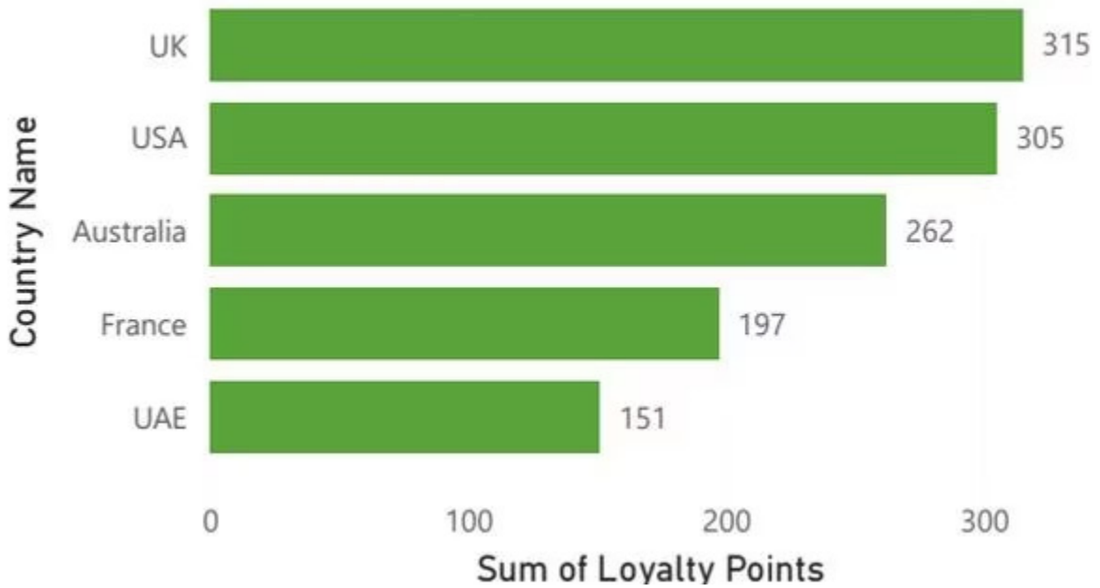
Loyalty Points by Country

Customer loyalty program performance varies significantly by geographic region, with the UK leading in total loyalty points accumulated. This metric reflects customer engagement and repeat purchase behavior across different markets.



UK - 315 Points

Leading market in customer loyalty with highest point accumulation, indicating strong brand engagement and repeat customer base

USA - 305 Points

Second-highest loyalty points, demonstrating substantial customer retention and engagement in the largest market

Australia - 262 Points

Strong third-place showing, reflecting healthy customer loyalty program adoption in the Australian market

France - 197 Points

Mid-tier performance with room for growth in customer engagement and loyalty program participation

UAE - 151 Points

Emerging market with lowest loyalty points, presenting opportunities for increased customer retention initiatives

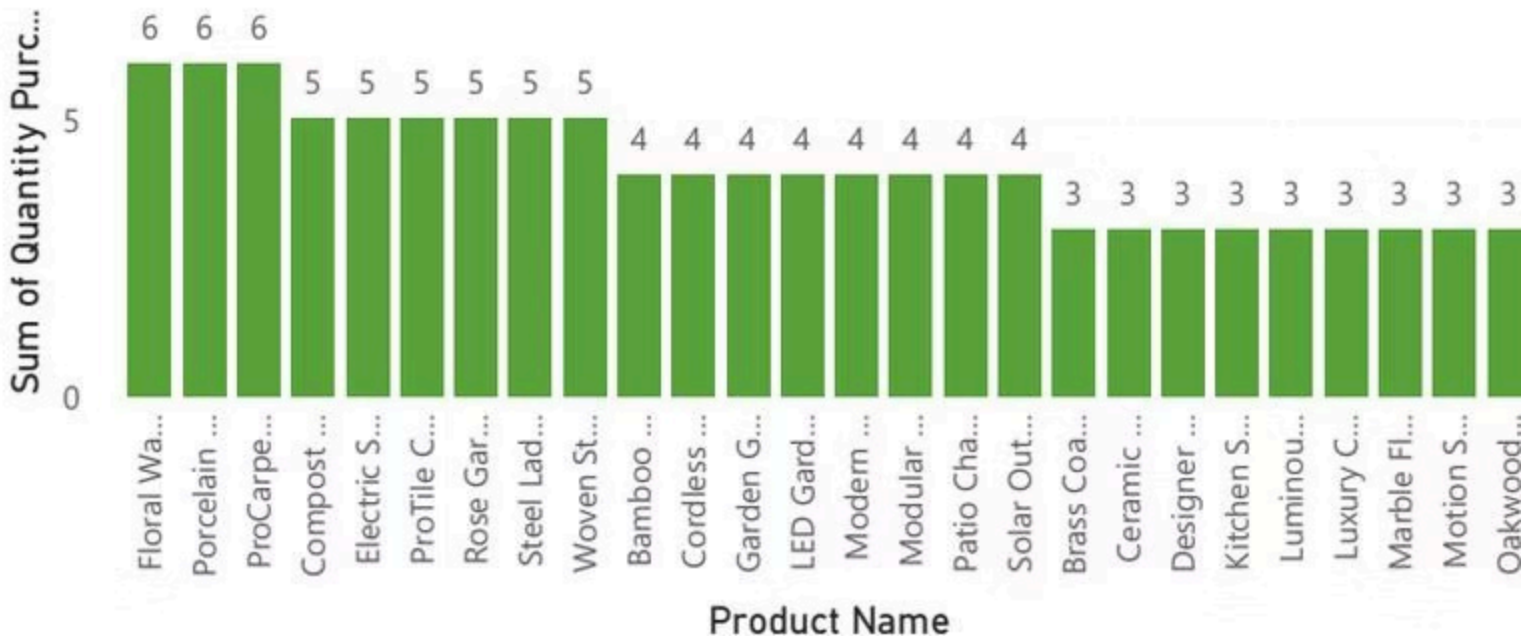
Quantity Sold by Product

Product-level sales analysis reveals strong performance across multiple categories, with three products tied for top position. The data shows a healthy distribution of sales across 27 different product types, indicating diversified revenue streams.



Top Performers (6 units)

- Floral Wall Art
- Porcelain Dinner Set
- ProCarpet Flooring

These three products lead in units sold, each achieving 6 units purchased during the measurement period.

Strong Performers (5 units)

- Compost Bin
- Electric Skillet
- Electric Cooker
- ProTile Carpet
- Rose Garden Fertilizer
- Steel Ladle Set
- Woven Storage Basket

Seven products achieved 5 units sold, showing consistent demand across multiple categories.

Mid-Tier (4 units)

- Bamboo Plant Pot
- Cordless Vacuum
- Garden Gloves
- LED Garden Lights
- Modern Desk
- Modular Sofa Set
- Patio Chair Set
- Solar Outdoor Light

Eight products sold 4 units each, representing solid mid-level performance.

Lower Tier (3 units)

- Brass Coat Rack
- Ceramic Vase
- Designer Mirror
- Kitchen Scale
- Luminous Clock
- Luxury Candle
- Marble Floor Tile
- Motion Sensor Light
- Oakwood Cutting Board

Nine products sold 3 units each, indicating baseline demand that could be improved with targeted marketing.

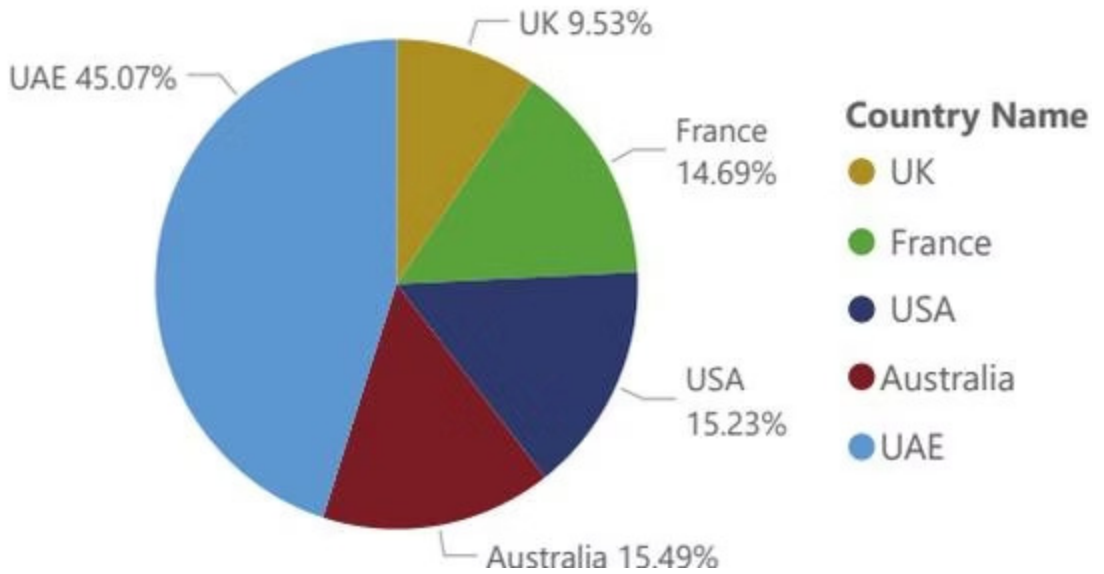
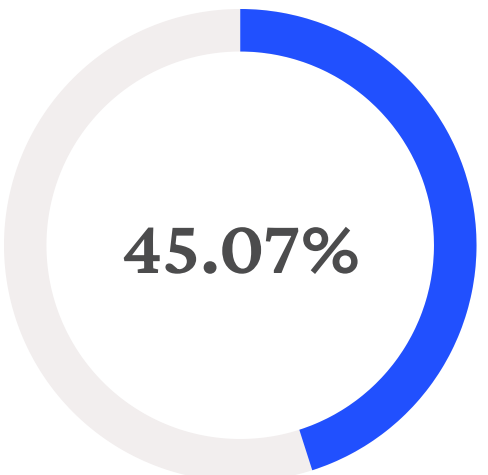
Median Sales Distribution by Country

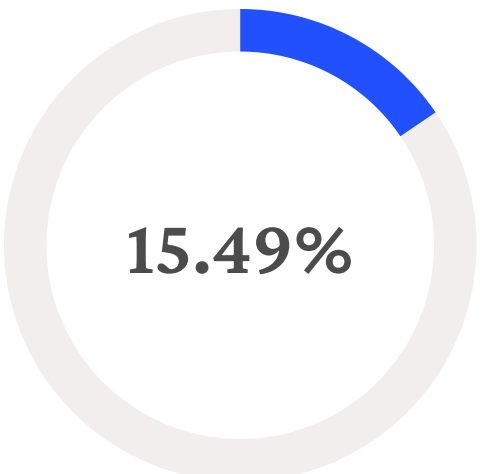
The distribution of median sales reveals a highly concentrated pattern with UAE dominating at 45.07% of total median sales. This concentration suggests the UAE market represents the primary revenue driver, while other markets contribute more balanced but smaller shares.





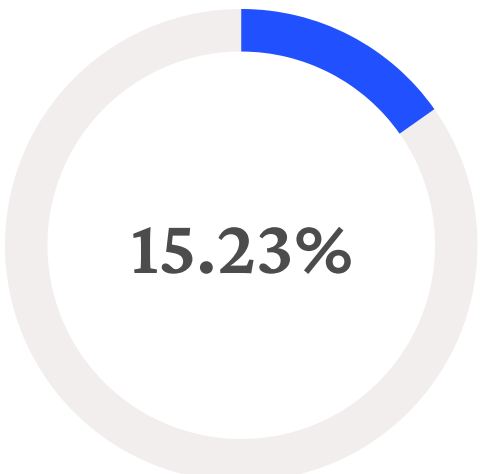
UAE

Dominant market with nearly half of all median sales, representing the primary revenue source



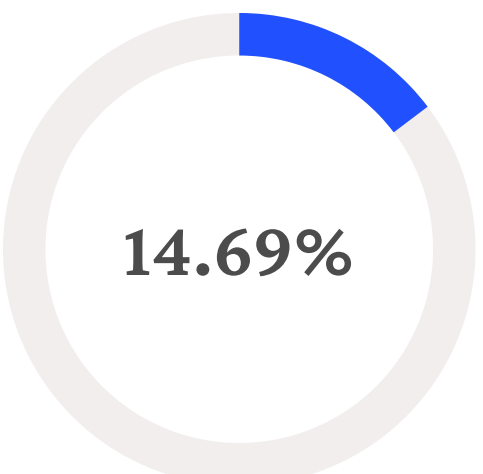
Australia

Second-largest contributor with balanced performance across product categories



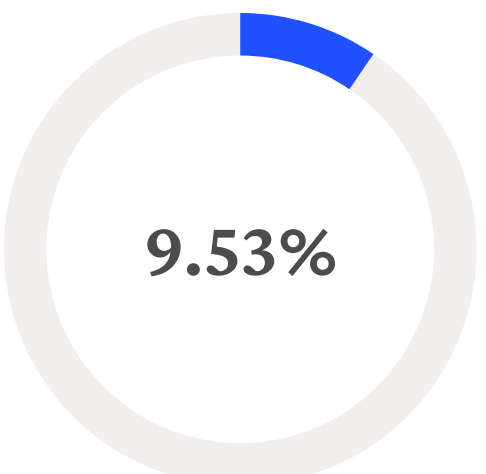
USA

Strong third-place showing with consistent median sales across time periods



France

Mid-tier market with steady but lower median sales compared to top performers



UK

Smallest share of median sales despite high loyalty points, indicating opportunity for improvement

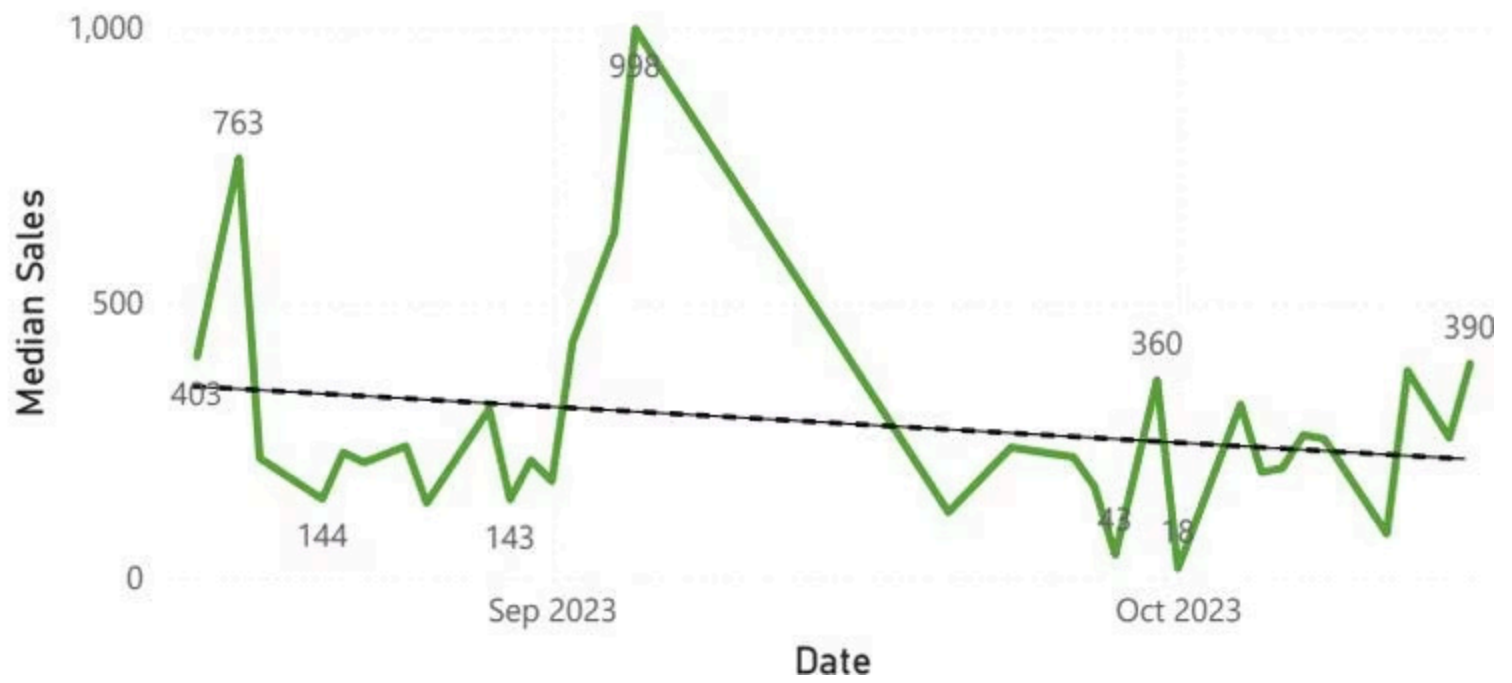
Median Sales Over Time

Time-series analysis of median sales from September 2023 reveals significant volatility with extreme peaks and troughs. The data shows eight data points ranging from a low of $13 to a high of $988, indicating inconsistent daily sales patterns that may require operational adjustments.



1

Sep 1: $405

Starting point with moderate median sales, establishing baseline performance

2

Sep 2: $763

First significant increase, showing 89% growth from previous day

3

Sep 3: $144

Sharp decline of 81%, representing one of the lowest points in the period

4

Sep 4: $143

Continued low performance with minimal change from previous day

5

Sep 5: $988

Peak performance with 590% increase, representing the highest median sales in the period

6

Sep 6: $360

Significant drop of 64% from peak, returning to more moderate levels

7

Sep 7: $13

Extreme low point with 96% decline, representing the worst performance day

8

Sep 8: $390

Recovery of 2,900% from previous day, returning to near-baseline performance

The extreme volatility suggests potential data quality issues, seasonal effects, or operational challenges that should be investigated to stabilize revenue streams.

Financial Performance Overview

$9,830 Net Revenue

Total net revenue in USD across all products and time periods, representing the financial foundation of the business

62.27% Profit Margin

Year-to-date profit margin demonstrating strong pricing strategy and operational efficiency in cost management

2020-2023 Period

Four-year measurement period from January 1, 2020 through December 31, 2023, providing comprehensive historical view

The business has achieved $9,830 in net revenue with a healthy 62.27% profit margin over the measurement period. This strong financial performance indicates effective cost control, appropriate pricing strategies, and healthy demand for products. The four-year period provides sufficient historical data to identify trends and make informed business decisions.

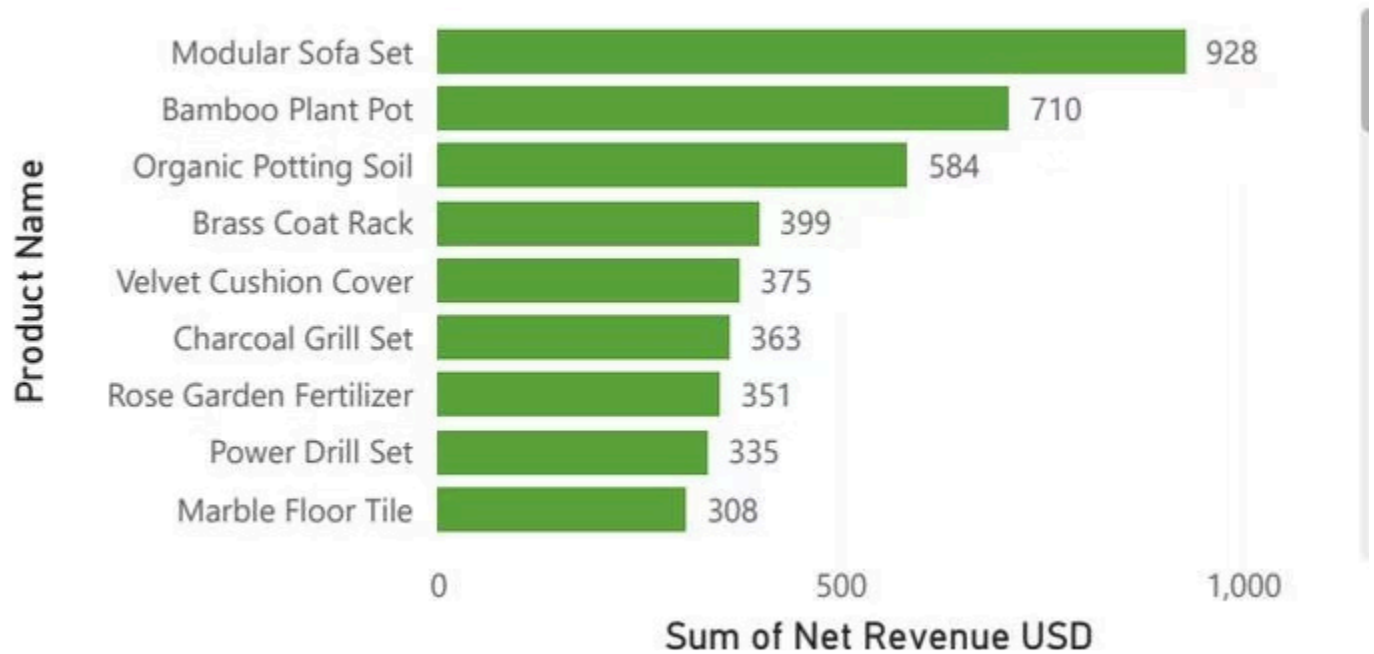
Net Revenue by Product

Product-level revenue analysis identifies the Modular Sofa Set as the top revenue generator with $928 in net revenue, followed by Bamboo Plant Pot at $710. The top 9 products account for the majority of revenue, with a long tail of lower-revenue items contributing to portfolio diversity.



Modular Sofa Set - $928

Leading revenue generator with nearly $1,000 in net revenue, representing furniture category strength

Bamboo Plant Pot - $710

Second-highest revenue at $710, showing strong performance in garden accessories category

Organic Potting Soil - $584

Third-place showing with $584 in revenue, demonstrating consistent demand for gardening supplies

Brass Coat Rack - $399

Home organization product generating $399 in revenue, representing entry-level furniture segment

Velvet Cushion Cover - $375

Home decor item contributing $375 in revenue, showing strength in soft furnishings category

Charcoal Grill Set - $363

Outdoor cooking product with $363 in revenue, representing seasonal product category performance

Rose Garden Fertilizer - $351

Gardening supplies with $351 in revenue, complementing plant pot sales in garden category

Power Drill Set - $335

Power tools generating $335 in revenue, representing DIY and home improvement category

Marble Floor Tile - $308

Building materials with $308 in revenue, representing home renovation product category

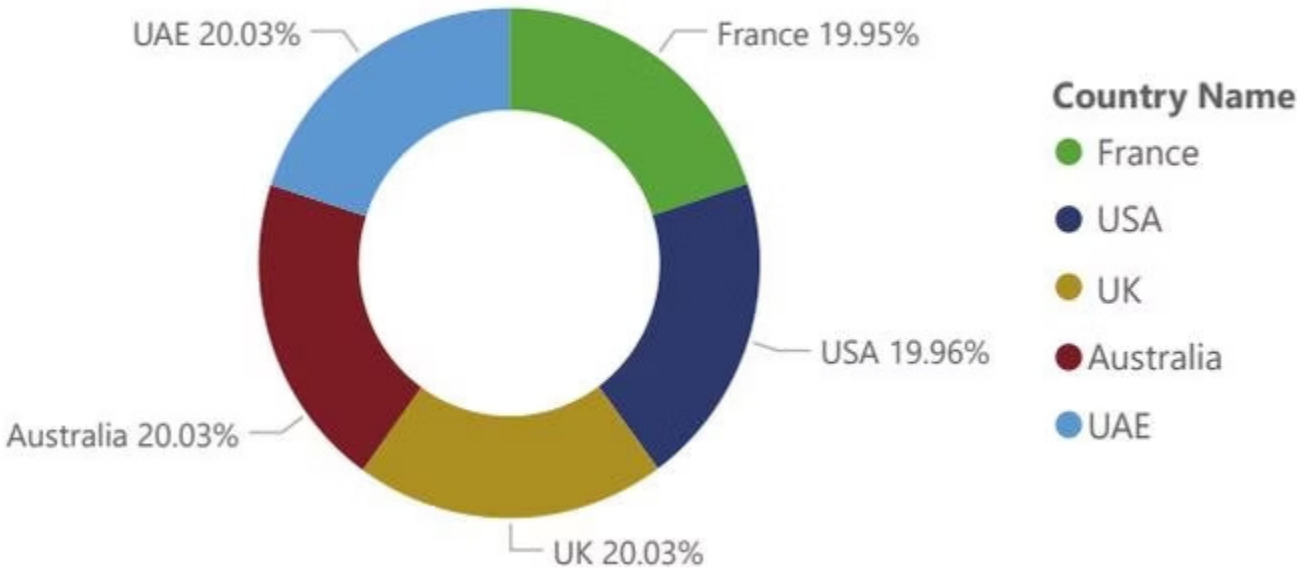
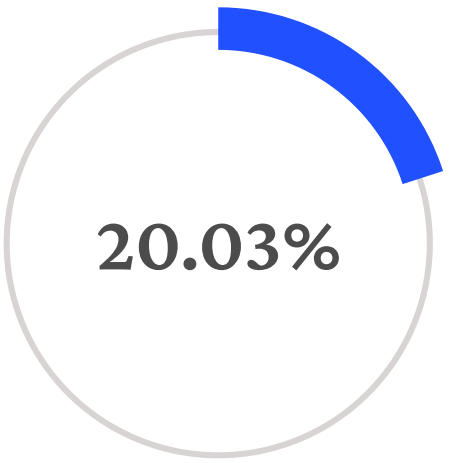
Yearly Profit Margin by Country

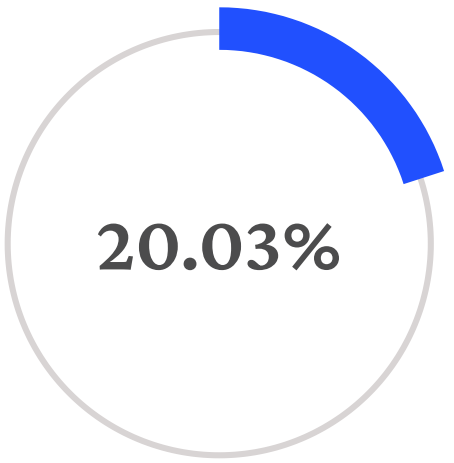
Profit margin analysis by country reveals remarkably consistent performance across all five markets, with all countries achieving profit margins between 19.95% and 20.03%. This consistency suggests standardized pricing and cost structures across geographic regions.





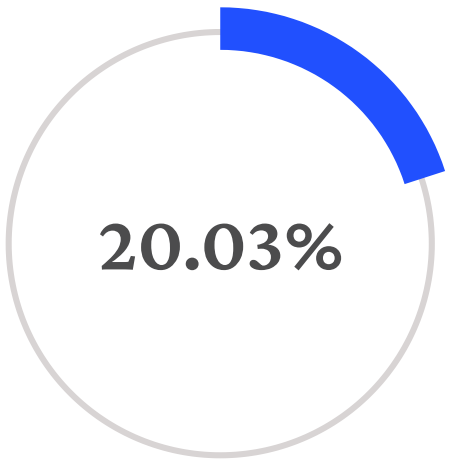
UK

Leading profit margin with 20.03%, representing optimal pricing and cost management



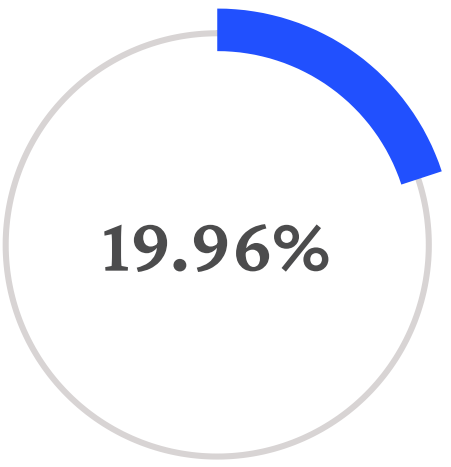
Australia

Matching UK performance at 20.03%, showing consistent operational efficiency



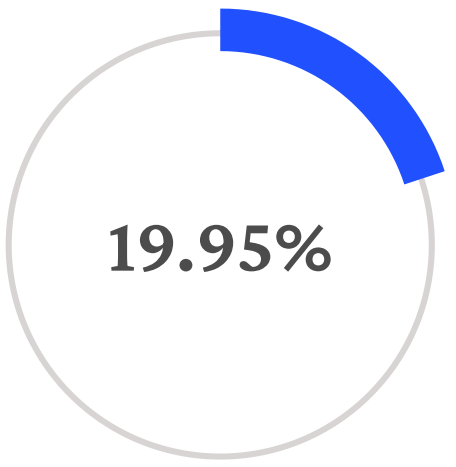
UAE

Also achieving 20.03% profit margin, demonstrating strong financial performance in dominant market



USA

Slightly lower at 19.96%, still representing strong profitability in largest market



France

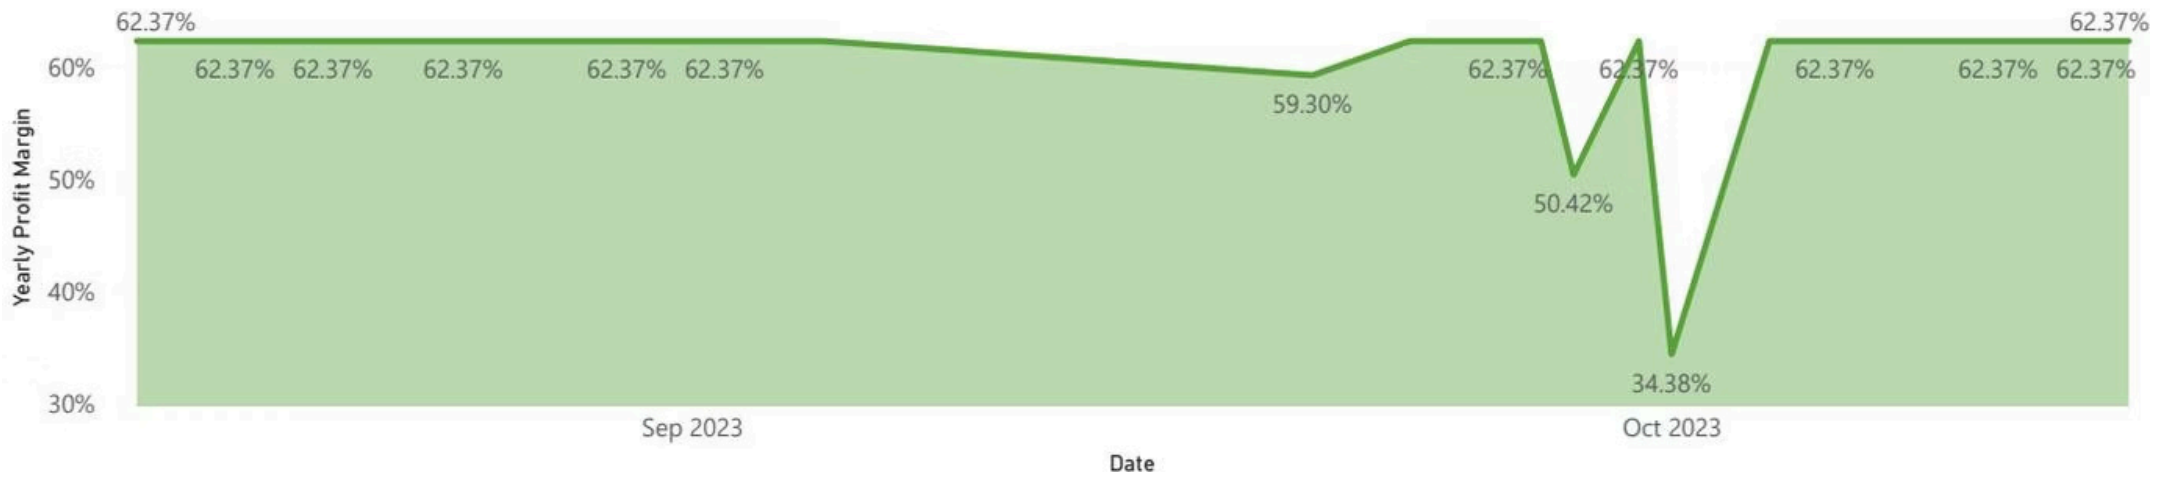
Lowest margin at 19.95%, with minimal difference from top performers

The narrow range from 19.95% to 20.03% across all countries indicates highly standardized business operations and pricing strategies. This consistency reduces complexity in financial management and suggests successful implementation of uniform business practices across markets.

Made with GAMMA

Yearly Profit Margin Over Time

Profit margin trend analysis shows significant fluctuation throughout 2023, starting and ending at 62.37% but experiencing a low of 34.38% in October 2023. The pattern suggests seasonal effects or operational challenges that impacted profitability mid-year before recovering.



Start: 62.37%

Beginning of period with strong 62.37% profit margin, establishing high baseline performance

Sep 2023: 62.37%

Maintained strong performance at 62.37%, matching starting point with no change

Mid-2023: 59.30%

First decline to 59.30%, representing 5% decrease from baseline performance

Late 2023: 50.42%

Continued decline to 50.42%, showing 15% decrease from starting point

Oct 2023: 34.38%

Sharp drop to 34.38%, representing 45% decrease from baseline and lowest point of year

End: 62.37%

Full recovery to 62.37%, returning to original baseline performance by year-end

The recovery to 62.37% by year-end demonstrates resilience and ability to correct operational issues. However, the significant mid-year decline warrants investigation into root causes such as increased costs, pricing changes, or product mix shifts that impacted profitability temporarily.
